

*“I was offered a job at AMV by Peter Souter over a table at DE&AD piled high with over 30 yellow and black pencils.*

*That was pretty motivating to say the least.”*

*I am an established Creative Director and Senior Art Director having worked as a creative since the mid 90's at some of London's premier league agencies:*

*Full time at M&C Saatchi, AMV BBDO, Ogilvy & Mather and McCann Erickson.*

*And freelance at VMLY&R (in both it's guises), Wunderman Thompson (as well as JWT), DDB Amsterdam, Leagas Delaney, Grey, Mullen Lowe, Saatchis, McGarry Bowen Iris Worldwide, and many others.*

*I have won awards at all the major awards festivals including Cannes and D&AD; enough for that itch to be scratched but my motivation has always been to do work that is not only commercially successful but engages people, not to stroke my ego or prove what a clever chap I am.*

*I am lucky enough to have spent the majority of my career working with hugely talented people, either as my CD's, as partners, or out on set and in the studio. I am experienced enough to know how to craft my work in a way that few can match and still have the passion and energy that comes with a genuine love for great ideas and creative communication.*

*I have an extremely broad range of experience in almost every sector, including b2b and financial services. Also client-side as in-house creative director at Christie's, the international art and auction specialist. And branding, as partner and creative director of Antidote, working alongside new brand start-ups.*

*I love pitching, working collaboratively with clients and leading project teams.*

*I embrace technology and constantly challenge myself to learn new skills both digitally and manually.*

*One of my passions is nurturing and mentoring younger creatives, and helping them develop their talent.*

*My first 'client-side' role, I learned a whole new industry inside out. I also learned alot about advertising by not being 'in' advertising. I joined Christie's with a brief to re-invent them as a luxury goods brand rather than an auction house. I worked with Lord Linley, chairman, and the heads of 88 internal departments, mostly from academic backgrounds and with little grasp of marketing but with huge enthusiasm (and most with huge country houses) to engage a wider audience with a revamped attitude, design and calendar of sales, events, exhibitions, editorial and PR. I also introduced them to environmental designers LAND Design Studio and together we undertook a £6m project which included a complete re-think of the customer experience, creating a new front of house, a virtual sale room with integrated online bidding platform and a contemporary new showcase gallery reclaimed from old disused office space.*

**A bit about me**

*I have been fortunate enough to work with some of the very best people to have ever worked in Advertising. Period.*

*To name a few: Jeremy Sinclair, Paul Arden, Maurice Saatchi, (Charles was famously absent from M&C), Tony Cox, Peter Souter, Peter Mead, Paul Brazier, Dave Dye, Paul Belford, Nigel Roberts, Tim Delaney, Robin Wight, Mark Roalfe and Damon Collins (twice).*

*From them I have learned many valuable lessons. But probably none more so than striving above all to be a nice person to work with.*

*One of the highlights of my early career was having Maurice and Charles Saatchi pitch my poster campaign idea to **Benson & Hedges**.*

*(It was their first pitch together after many years and Charles' last.) We didn't win it. That was also the biggest disappointment.*

*However, demonising Tony Blair for the **Conservative Party** and creating one of advertising's most memorable images made up for it a year later.*

*I love making work that gets talked about. The fact we are (increasingly) able to influence the purchasing decisions of millions keeps me excited. I am less interested in the recognition of my fellow ad people. I'd rather make work that gets talked about.*

*I am a very hands on creative. I love to get involved with photography, animation, illustration, writing and design.*

*I also love working with people. I am naturally collaborative and enjoy spending time with young creatives, nurturing their talent and learning from them in return. I'm still learning, we're all still learning...*

**My passions**

**Design: Architecture, design and furniture.**

*I take DIY a bit literally and design my own Mid Century inspired furniture and interior pieces, then make them from scratch.*

**Animation:** *I am currently writing an animation short which I plan to animate myself if I have time.*

**Illustration:** *I am also working on a series of illustrations called Advertising Then & Now.*

**Music:** *I have a past life as a bass player in an Acid Jazz band in the early 90's. We were offered a spot on a compilation record by Acid Jazz records - our then manager turned it down!*

**Cycling:** *I raced bikes back when cycling was still seen as a bit niche. One of my teammates was Chris Boardman who went on to win Gold at the Barcelona Olympics and become the Transport for London cycling 'tsar'. Needless to say he always beat me.*

*More recently I cycled across the Alps with the Fireflies to raise money for Leukemia research and from John O'Groats to Lands End in 2019 with a group of friends just for the challenge. I have also recently bought a 1982 Mercedes stationwagon (combining my love of cars and bikes) which I have converted into a vintage Giro d'Italia Campagnolo team service car.
