

Creating joyful experiences with an inspired initial conceptual vision, crafting the defining design details, and delivering an exceptional executed experience.

I believe in the CREATIVE PROCESS of PROBLEM SOLVING; a passionate approach to design that utilizes refined COMMUNICATION, a dialogue of COLLABORATION, and the CRAFTING of utopian solutions through pragmatic objectives. I believe great design to be the combination of three elements:

AESTHETICS [the emotional sensation from artistic beauty] + TECTONICS [the crafted poetic details of fabrication] + BEHAVIORS [the joyful intended use of an environment]
