# Michael Tucker

Portfolio: [MichaelTucker3D.carbonmade.com](https://michaeltucker3d.carbonmade.com)

3D Artist, 4 years professional experience plus freelance work. Hardworking, reliable, team player, confident working in a busy environment and able to adapt to the situation as required. Enthusiastic with a good sense of humour.

## Experience

### 3D Art & Game Development

#### May 2024 - Current - Versus X - Senior 3D Artist

*eSkillz is an indie studio developing a crypto based metaverse sports gaming suite. (Staff cutbacks due to financial difficulty, now seeking other employment)*

- Lead artist on the Main social space of the game, players return the the "Hub" to socialise between matches.
- Optimisation work on other levels in the game to improve overall performance.

#### May 2022 - May 2024 - MxReality - 3D Artist

*MxReality is a small development studio that focuses on Metaverse-based 3D training games for a variety of industries and the education sector. They also provide more bespoke projects for clients who have a specific vision such as design and marketing.*

- Part of a small 3D team that supports a much larger team of developers to create client-focused interactive products.
- Regularly worked on several projects at once, able to balance time effectively and independently.
- Communication with Clients, ensuring their vision is as close to the final product as possible
- Extremely collaborative, problem-solving based team.
- Very diverse workload, e.g. one day creating industrial training environments and then another making organic outdoor spaces
- Personally established new workflows which the team has widely adopted

#### 2020 - 2022 - Dovetail Games - 3D Vehicle Artist

*Dovetail Games is a long-running studio that develops the Train Simulator & Fishing Simulator IPs, as well as others. Primarily focusing on regularly delivering DLC for its titles with yearly releases published to Consoles and PC*

- Creation of new railway vehicles for Train Sim World 2
- Interior and Exterior work
- Reskinning of old assets for new DLC packages
- Working within a team, often merging work and assets with colleagues to create finished products.
- Rigging and animation of mechanical systems
- Working to a schedule and logging time spent on tasks

#### 2018 - 2020 Freelance 3D Art and 3D printing services

- Regular communication with clients to ensure work is up to standard
- Working to deadlines
- Managing Invoices and record keeping

Some examples of clients:

##### Taff Valley No.28 Restoration Society

Train Simulator Locomotive modelled, textured, and fully implemented into TS2020

##### Arrow Group

Office Furniture Renders and Office Chair Animation to a realistic standard.

##### Oliver Mason

3D Characters for Cartoon prototype/pitch.

### Retail and Service

#### 2019 - 2020 CEX Limited

Front desk and customer service work

#### Summer 2017 - The Bierkeller Cheltenham

Promotional Staff and other customer facing roles

#### Summers of 2014, 2015, 2016 - Ffestiniog Railway

Steam Engine Fireman / Yard Worker

#### Summer 2013 - David Silver Motorcycle Spares

Parts Photographer / Office assistant

### Hobbies & Interests

Strong Interest in Motorcycles, Cars, 3D printing design, and anything mechanical. I spend lots of my free time dog walking or taking cars apart and occasionally putting them back together.
